DOTIN • ENTERPRISE INSURANCE SAAS PLATFORM

TEHRAN (HYBRID)

- Reframed platform redesign from "fix one issuance flow" to building scalable product infrastructure across a shared enterprise insurance SaaS platform...
- Established a 40+ component design system supporting a scalable enterprise SaaS platform through semantic tokens, RTL-native architecture, and Figma-to-code mapping...
- Standardized enterprise interaction patterns through reusable data tables, Advanced Search, and navigation redesign.
- Introduced AI-assisted document generation and established the organization's first UX governance framework to improve design quality and cross-functional collaboration.
