### PROFESSIONAL SUMMARY

Senior Product Designer with 5+ years of experience in insurance, fintech, and financial services — enterprise platforms, consumer products, and regulated omnichannel ecosystems. Completion rates from 58 to 73 percent. Validation errors reduced 45 percent. Two 0-to-1 financial products designed. A design system that survived team transitions. I join organizations where no design infrastructure exists, build measurement frameworks before opening Figma, and leave behind scalable systems that work without me.

### CORE EXPERTISE

#### Product Strategy & Design

•Product Strategy •Product Discovery •Enterprise UX •Consumer UX •0-to-1 Product Design •Platform Design •Omnichannel Product Design •Multichannel Product Design

#### Systems & Architecture

•Design Systems •Design Governance •Component Architecture •Design Tokens •Semantic Tokens •Design-to-Code •Figma Variables •Design Operations

#### UX & Research

•Information Architecture •Interaction Design •User Research •Usability Testing •Journey Mapping •Service Design •User Flows •Wireframing •Prototyping

#### Collaboration & Product Development

•AI-Augmented Design •Cross-functional Leadership •Stakeholder Management •Developer Collaboration •Agile •Data-informed Decision Making •Accessibility

#### Domains

•Insurance •Financial Services •FinTech •Investment & Capital Markets •Regulated Products •B2B •B2C

### EXPERIENCE

#### Senior Product Designer (Lead 0 to 1 per project)

December 2024 – Present

**DOTIN(RITON) — ENTERPRISE OMNICHANNEL INSURANCE PLATFORM FOR PASARGAD INSURANCE**

TEHRAN, IRAN

Sayban Platform Redesign, 10+ Insurance Lines, 5 Personas

- Joined as organization's first Product Designer with no existing KPIs, no analytics infrastructure, and no design system. Established 9 baseline KPIs before redesigning including Completion Rate at 58 percent, Error Rate at 14 percent, First-Time Success Rate at 38 percent, Rework Rate at 31 percent, and Agent CSAT at 2.8 out of 5
- Reframed project from fixing a single issuance form to rebuilding the entire Sayban insurance management system across 10+ insurance lines serving 5 distinct personas including agents, branch managers, headquarters staff, support team, and specialists
- Conducted stakeholder interviews, designed user questionnaires with strong response rate, and ran usability testing with 5 users including 3 expert insurance agents and 2 regular users
- Used Affinity Mapping, Journey Mapping, Empathy Mapping, 3 Personas, Competitive Analysis, Value Proposition Canvas, and Information Architecture to define redesign strategy
- Architected standardized business components on ShadCN UI that became the foundation for a UI Generator, collaborating directly with frontend engineering to generate local components from scratch
- Built 40+ component design system with semantic tokens, Figma-to-code mapping, and multi-theme support for multiple Riton clients
- Established contractual governance documents enabling frontend developers with analysts to build flows independently under design oversight until UX Check stage
- Established organization's first design governance framework including Design Brief, RACI matrix, Design QA gate, and Handoff standards

### Measurable Impact

- **Completion rate** improved from approximately 58 percent to 73 percent
- **Validation errors** reduced approximately 45 percent (server logs)
- **First-time success rate** improved from 38 to 64 percent
- **Rework rate** reduced from 31 to 12 percent
- **Agent satisfaction CSAT** improved from 2.8 to 4.1 out of 5
- **Time on task** reduced by 18 percent
- **Form-related support tickets** reduced by 20 percent
- **Search filter adoption** more than doubled
- **Designer onboarding time** reduced from 6 weeks to 3 weeks
- **Time-to-launch new insurance products** reduced by approximately 35 percent

**Current Progress:** Life, Third-Party, Medical Travel, Financial System, and Sales Organization modules live. Remaining **insurance lines** in active design. **Design system** building in parallel.

### UnitLink Consumer Investment Platform, 0-to-1 Product, Launching Soon

- **Leading** product design and **strategy** for UnitLink, Pasargad Insurance's consumer digital **investment** platform combining 9 investment fund types with life insurance, leveraging Vipod digital bank and Pasargad Insurance ecosystem
- Started from zero alongside **Product Manager, CTO, frontend and backend** teams. Integrated **AI** into **design thinking process** to accelerate analysis without sacrificing depth
- Conducted competitive analysis across 8 players in 3 market layers, developed 3 data-backed personas, and built a **7-phase by 8-layer Experience Map** identifying trust as the primary product challenge
- Defined MVP roadmap of **35 features across 4 priority tiers** using **MoSCoW framework** with **10 Must-Have features** for gold-only launch
- Designed **trust-first product** architecture including pre-signup **investment calculator**, **transparent fee** visualization with 94/4/2 breakdown, **life insurance** positioning, and Spouse **Test principle**
- Compressed standard **8-week** discovery timeline to **3 weeks** through **AI-augmented** research workflows
- Defined pre-launch KPIs: **Sign-up Completion** greater than 80 percent, **Time to First Investment** under 5 minutes, **Calculator Usage** greater than 60 percent, **Risk Quiz Completion** greater than 90 percent

**Current Status:** Discovery complete. **MVP** approved. **15 wireframe** screens designed. **Launching soon.**

## Product Designer

February 2022 – December 2024

### HAMRAH AVAL — EWANO MULTICHANNEL FINANCIAL PLATFORM

TEHRAN, IRAN

#### Digital Credit Product, 0-to-1 LendTech, Shipped Across 3 Channels

- Served as **sole product designer** for Ewano's LendTech micro-credit platform built in collaboration with Ewano fintech team and Hampa, a joint venture of Hamrah Aval and Bank Parsian
- Designed complete product infrastructure from zero including **credit activation flows**, **credit management dashboard**, **card management**, and **installment management**
- Shipped across **B2C, B2B, and CIP** channels as a new financial service
- Replaced dense legal documentation with **progressive visual** repayment breakdowns and negotiated plain-language alternatives for **12 financial terms** with **Legal team** while maintaining regulatory compliance
- Designed complete **decision-state architecture** with Risk team mapping **8+ lifecycle states** across all channels

### Measurable Impact

- Launched from zero to live across **3 service channels** B2B, B2C, and CIP
- **Zero** compliance incidents post-launch
- **Activation rate** reached 72 percent of eligible users
- **Terms acceptance rate** increased 34 percent after plain-language redesign
- **On-time repayment rate** reached 91 percent
- **Confusion-related support tickets** reduced 40 percent
- **Credit product** became a new revenue stream for the platform
- **Visual repayment format** adopted by Risk team for other financial products

### Ewano Design System, 120+ Components — Rebuilding Ewano Platform

- Requested **Google Analytics** setup to establish quantitative baselines. Conducted **stakeholder interviews**, collected **support feedback**, and **distributed questionnaire** to Ewano users and potential users
- Identified key user needs including **wallet, store, cashback, card-to-card**, and **B2B welfare baskets**. Confirmed lack of design consistency as primary UX problem through Google Analytics data showing system instability and high payment **error rates**
- Secured executive buy-in by presenting Wall of **Inconsistency** showing 14 button styles, 5 color palettes, and 9 input patterns across 8 independently built product modules
- Built **unified design infrastructure** with **semantic tokens**, **atomic component** library with Auto-Layout and Variants, **Figma-to-code** mapping, **governance processes**, **contribution workflows**, and **semantic versioning**

Post-Launch Data-Driven Iteration:

- After KPI measurement, Product Manager identified **engagement rate** drop on **card-to-card**, **SHEBA conversion**, and **account number retrieval**
- Formulated **2 hypotheses**, designed **MVP prototypes for both**, tested through **A/B testing** and **usability testing** simultaneously
- Winning approach: **banking services package** consolidating all banking features into **unified entry point**
- Result: **engagement rate increased** and **Time on Task decreased**

Measurable Impact

- Unified 8 product modules into 1 coherent **design system**
- **Reduced button variants** from 14 to 4 and color palettes from 5 to 1
- **Standardized 120+ reusable components across the platform**
- Post-launch **A/B testing** increased banking **engagement** and reduced **Time on Task**
- Developer clarification requests **reduced by 55 percent**
- **Component reuse rate** reached 87 percent
- **Feature design time** reduced by **40 percent**
- **Design system governance** survived team transitions and continued evolving after handover

KEY ACHIEVEMENTS

- Increased issuance **completion rate** from **58 to 73 percent** and reduced **validation errors** from **14 to 8 percent** (45 percent reduction) by redesigning the entire Sayban insurance platform across 10+ insurance lines and 5 user personas — as **the organization's first Product Designer**
- Improved **first-time success rate** from **38 to 64 percent** and reduced **rework rate** from **31 to 12 percent** through modular form architecture, inline validation, and smart defaults — **saving agents hours of daily rework.**
- Raised agent satisfaction (CSAT) from **2.8 to 4.1** out of 5 by **unifying fragmented workflows** into a consistent cross-product experience
- **Architected business components** that became **the foundation for a UI Generator** — enabling frontend teams to generate new insurance line flows in days instead of weeks, reducing **time-to-launch** by approximately **35 percent**
- Shipped a **LendTech credit product** from zero to live across **3 channels (B2B, B2C, CIP)** with zero compliance incidents, achieving **72 percent activation rate** and **91 percent** on-time repayment
- **Compressed** 8-week product discovery to 3 weeks through **AI-augmented research** workflows while maintaining stakeholder **alignment** and research quality — **for a 35-feature investment platform MVP**
- Built a **120+ component design system** that unified 8 independently-built product modules, reduced **feature design time** by 40 percent, and achieved 87 percent **component reuse rate**
- Established **the first design governance framework** in two organizations — contractual **design documents**, **RACI matrix**, **Design QA** gates — resulting in **zero** unauthorized UI changes post-rollout
