PROFESSIONAL SUMMARY

Senior Product Designer with **5+ years** of experience designing **enterprise and consumer** products across **insurance**, **financial services**, **fintech**, and **investment & capital markets**. Experienced in product **strategy**, **complex** product ecosystems, **omnichannel** and **multichannel** experiences, and designing **scalable solutions** across business, design, and engineering contexts.

CORE EXPERTISE

Product Strategy & Design

- Product Strategy • Product Discovery • Enterprise UX • Consumer UX • 0-to-1 Product Design • Platform Design • Omnichannel Product Design • Multichannel Product Design

Systems & Architecture

- Design Systems • Design Governance • Component Architecture • Design Tokens • Semantic Tokens • Design-to-Code • Figma Variables • Design Operations

UX & Research

- Information Architecture • Interaction Design • User Research • Usability Testing • Journey Mapping • Service Design • User Flows • Wireframing • Prototyping

Collaboration & Product Development

- AI-Augmented Design • Cross-functional Leadership • Stakeholder Management • Developer Collaboration • Agile • Data-informed Decision Making • Accessibility

Domains

- Insurance • Financial Services • FinTech • Investment & Capital Markets • Regulated Products • B2B • B2C

EXPERIENCE

Senior Product Designer

December 2024 – Present

DOTIN(RITON) — ENTERPRISE OMNICHANNEL INSURANCE PLATFORM FOR PASARGAD INSURANCE

TEHRAN, IRAN

Enterprise Insurance Platform Redesign

- Reframed the **omnichannel platform** redesign from optimizing a single issuance flow to building **modular infrastructure** across Vehicle, Property, and Life insurance lines after field research with agents revealed structural inconsistency as the root cause of low completion rates.
- Built a **40+ Localcomponent** design system on Shadcn UI with semantic tokens, and **Figma-to-code** mapping, enabling engineering teams to ship new insurance products with reduced **UX dependency**.
- Introduced Advanced Search feature that more than doubled **filter adoption**, **standardized a Reusable Data Table component** adopted across **4 modules**, and restructured **platform navigation** through card sorting with **8 insurance agents**.
- Designed and operationalized AI-assisted document generation workflow with context-aware templates, automatic policy pre-fill from records, and agent-controlled clause approval, reducing document preparation time by approximately **70 percent**.
- Established the **organization's first UX governance framework** including **Design Brief**, **Design QA gate**, and **Handoff standards**, eliminating unauthorized UI changes after rollout.

Measurable Impact

- **Completion rate** improved from approximately **58 percent** to **73 percent** (estimated)
- **Validation errors** reduced approximately **45 percent** (server logs)
- **Reusable Data Table** component adopted across **4 product modules**.
- **Search filter adoption** more than doubled
- **Zero unauthorized UI** changes after governance rollout
- **Approximately 20 percent** reduction in form-related support tickets

Consumer Omnichannel Investment Platform (0-to-1 Product, In Progress)

- Leading product design and strategy for Iran's first insurance-backed **omnichannel digital investment platform** combining 9 investment fund types with embedded life insurance for users facing 40 percent annual inflation
- Conducted competitive analysis across 8 players in 3 market layers, developed **3 data-backed personas**, and built a **7-phase Experience Map** identifying trust as the primary product challenge.
- Defined **MVP roadmap of 35 features** across 4 priority tiers with recommendation algorithm mapping 12 user profiles to personalized investment and insurance bundles.
- Designed trust-first product architecture including pre-signup **investment calculator**, **transparent fee** visualization (94/4/2 breakdown), and invisible life insurance positioning.
- Compressed standard 8-week discovery timeline to **3 weeks** through AI-augmented research workflows while **maintaining research quality** and **stakeholder alignment**.

Current status:

DISCOVERY COMPLETE → MVP APPROVED → 15 WIREFRAME SCREENS DESIGNED → ENTERING HIGH-FIDELITY PHASE

Product Designer

February 2022 – December 2024

HAMRAH AVAL — EWANO MULTICHANNEL FINTECH PLATFORM

TEHRAN, IRAN

Digital Credit Product (0-to-1 Launch, 3 Channels)

- Served as sole product designer for a multichannel **micro-credit service** launched across **B2B, B2C, and CIP** channels inside a telecom super-app, reframing the design challenge from form design to **building financial trust** in an unfamiliar context.
- Replaced dense legal documentation with progressive visual repayment breakdowns and negotiated plain-language alternatives for **12 financial terms** with Legal team while maintaining full regulatory compliance.
- Designed complete **decision-state architecture** in collaboration with Risk team, **mapping 8+ lifecycle states** across all service channels including eligibility, application, review, approval, disbursement, repayment, and completion.

Measurable Impact

- Launched from **zero to live across 3 service channels** (B2B, B2C, CIP)
- Credit product became **a new revenue stream for the platform**
- **Visual repayment format** adopted by Risk team for other financial products

Design System — Rebuilding Ewano Platform

- Secured executive buy-in by presenting a Wall of Inconsistency showing 14 different button styles, 5 color palettes, and 9 input field patterns across 8 product modules built independently by different teams.
- Built **unified design infrastructure** including semantic **design tokens**, **atomic component library** with **Auto-Layout** and **Variants**, and governance processes with contribution workflows and **semantic versioning**.
- Created Figma-to-code component mapping documentation and held **weekly sync sessions** with developers during initial two months of implementation.
- Designed governance model with **usage guidelines**, **contribution process**, **review workflow**, and changelog that remained active after team transitions.

Measurable Impact

- Unified 8 product modules into 1 coherent **design system**
- Reduced button variants from 14 to 4, color palettes from 5 to 1
- **40+ reusable components** standardized across the platform
- **Design system governance** survived team transitions and continued evolving after handover

Product Designer (Freelance)

2021 – 2022

Iranicard — FinTech

- Led **information architecture audit** and competitive **benchmarking**.
- Redesigned **onboarding** and **landing flows** to improve trust perception in financial services context.

Monoppy — Fitness Data Product

- Designed **interactive performance-tracking** dashboard with real-time data visualization.
- Built reusable data visualization component system for **user progress metrics**.

Switch Safar — Travel

- Delivered **mobile-first responsive landing** experience aligned with brand strategy
- Designed **scalable application UI Kit** with **documented component** specifications.

SELECTED PRODUCT HIGHLIGHTS

Insurance Platform Redesign | Enterprise + Omnichannel + Platform

Role: Sole Product Designer and Design Lead

Challenge: Fragmented enterprise insurance platform with inconsistent workflows across Vehicle, Property, and Life lines causing low completion rates and high validation errors

Solution: Reframed from flow optimization to modular platform architecture. Built 40+ Local component design system, AI-assisted document generation, and organization's first UX governance framework.

Outcome: Completion improved from 58 to 73 percent. Validation errors reduced 45 percent. Components reused across 4 modules. Zero unauthorized changes after governance.

Pasargad Omnichannel Investment Platform | 0→1 + Product Strategy + Financial Services

Role: Lead Product Designer defining product strategy and architecture

Challenge: No digital investment product existed. Users losing savings to 40+ percent inflation had no platform combining investment, insurance, and banking.

Solution: Defined trust-first product architecture with personalization engine, transparent fee model, and invisible insurance. AI-augmented discovery compressed 8-week timeline to 3 weeks.

Outcome: MVP approved with 35 features. 9 fund types incorporated into the product architecture. Currently entering high-fidelity design.

Digital Credit Product (0-to-1, Multichannel) | Multichannel + FinTech + Regulated Product

Role: Sole Product Designer across B2B, B2C, and CIP channels

Challenge: Users had no mental model for credit inside a telecom app. Strict regulatory requirements on every screen

Solution: Built trust architecture through progressive disclosure, visual repayment breakdowns, and plain-language legal terms negotiated with Legal team. Mapped 8+ decision states with Risk.

Outcome: Launched across 3 channels. Zero compliance incidents. New revenue stream created.

Ewano Design System | Design Systems + Governance + Product Infrastructure

Role: Designer and System Architect

Challenge: 8 product modules designed independently with 14 button styles, 5 color palettes, and no shared components

Solution: Created wall of inconsistency for stakeholder buy-in. Built atomic component library with semantic tokens, governance model, and Figma-to-code mapping.

Outcome: 8 modules unified. 40+ components standardized. System survived team transitions through governance.
